Antibacterial Combi Blinds

Differentiated with post-processed products, **ATB<sup>®</sup>-UV<sup>+</sup>** inserts the silver component inside the yarn with special technology and shows excellent antibacterial performance even after washings. Cross-section structure of special fiber with many small pores allows quick release of sweat and maintains freshness. Moreover, it blocks UV-A(320~400nm) that penetrates deep into the skin.

Eco-Friendly Raw Material

Removal of Harmful VOC's (Formaldehyde, etc.)

Decomposition of Harmful Substances and Air Purification

Antibacterial Antifungal

UV Protection Dehumidification

Elegant Interior Effect

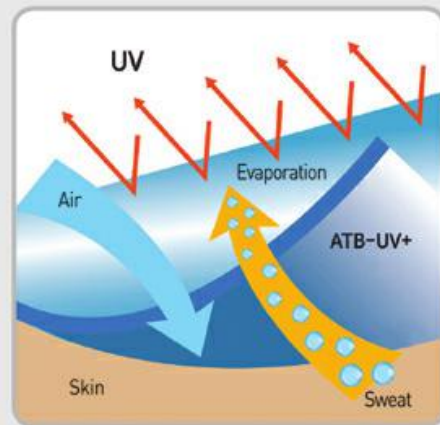

High-quality blind with natural health and freshness

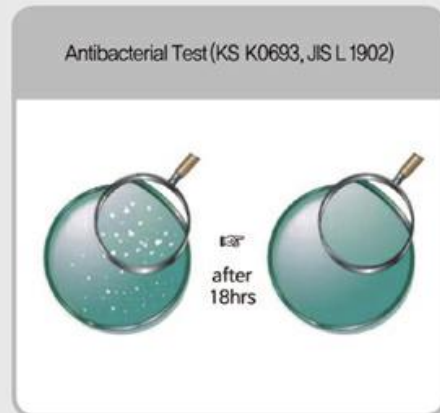

## High-Tech **Antibacterial** Fabric Blind

Kolon'seco-friendly ATB-UV is a high-quality product which offers 99.9% antibacterial function by silver content to secure health and freshness and fits perfectly with your family

### UV Protection

It blocks UV rays that penetrate deep into the skin by blocking not only UV-B(290~320nm) but also UV-A(320~400nm).

### Excellent Antibacterial Function

ATB-UV+ provides excellent antibacterial effect by containing silver component.

Differentiated with post-processed products, the silver component is inserted inside the yarn with special technology and shows excellent antibacterial performance even after several washings.

ATB-UV+ is safe with FDA approved safe silver component.

ATB-UV+ inhibits the growth of microorganism and prevents secondary odor.

### Fast discharge of moisture and drying

ATB-UV+ has specially designed cross-section structure that releases sweat or moisture and dries quickly.

ATB-UV+ offers freshness in rainy season in summer and warmth during winter with rapid drying.

**GREENGUARD**

The GREENGUARD Certification Program (formerly known as GREENGUARD Indoor Air Quality Certification) gives assurance that products designed for use in indoor spaces meet strict chemical emissions limits, which contribute to the creation of healthier interiors. Achieving GREENGUARD Certification gives credence to manufacturers' sustainability claims, backing them with empirical scientific data from an unbiased, third-party organization.

GREENGUARD Certification standards have established performance-based standards to define products and processes with low chemical and particle emissions for use indoors. The standards are primarily for building materials, finishes, interior furnishings, furniture, cleaning products and electronic equipment. The standards establish certification procedures including test methods, allowable emission levels, product sample collection and handling, testing type and frequency as well as program application processes, toxicity limits and acceptance.

Don't miss your great opportunities to get eco-friendly blinds which is certificated from Greenguard.

Wincrea is only one company which has this certification, we will do our best to support you.

Are you still buying blinds based on their designs?

It's time to choose your blinds with your family's health as your utmost concern.

Eco Wincrea lines were developed over several years and are made with a special coating that is antibacterial, prevents odors, dust and fleas from entering the household while also getting rid of toxins.

It has been certified as an environmentally friendly product by the FITI testing Institute, Korea's testing organization for textiles.

The Silveria-treated materials used for the mite/flea testing results show that the infestation and spread of long legged dust mites (*Dermatophagoides pteronyssinus*) is blocked up to 99.9%

HIGH QUALITY WINDOW BLINDS COLLECTION

## ECO SERIES

The blinds are start and end of the interior. We will not bring out any uniform blinds. With sophisticated sense and fantastic idea, we create products which are more comfortable and more beautiful. These blinds will let you control sunlight freely.
